Strategy of Skills Evaluation System Promotion Program in 2019-20 Cambodia

- Priority Trades for Cambodia
 - Electric Industry
 - Industrial needs
 - Synergy with legal system and current training scheme
- Expected Goals
 - Strengthen assessors and test takers on Sequential Control,
 - Assessors be trained for stable operation on Electrical System Maintenance,
 - Further support for Electrical Installation.
- Consideration
 - Training opportunity toward the test,
 - Could be a burden if too many courses implemented in short period,
 - Administration should be facilitated for the sake of institutes,

Proposed activities in 2019-20 Cambodia

AS EXAMPLE

- Electrical System Maintenance, grade 3,
- Sequential Control, grade 3,
- Electrical Installation as competition,
for each job category, test trials and training courses as well as some assessors training can be selected.
- Two-week technical seminar in Japan with visit to national skills competition in Aichi
